### DESCRIPTION OF PSYCHOEDUCATIONAL ASSESSMENT

Wild Rose Public Schools, through its Student Services Department, provides psycho educational assessment services. These services are designed to assist in educational programming for students who are experiencing significant learning needs. The assessment forms the basis for:

- A description of the general and/or specific factors which appear to be affecting student academic progress.
- A diagnosis (if possible).
- General and/or specific suggestions and recommendations for interventions.

The battery of tests administered may include, but is not necessarily limited to, measures of intelligence, achievement, behavior, perceptual skills and visual-motor skills. The results and findings of the assessment and the recommendations for the student's educational program and behavior are communicated to the student's parent(s)/guardian(s) and school personnel, usually in the form of a school-based meeting.
